Chicago, IL | 630-486-2480 | tarafdarpartha2025@gmail.com | [LinkedIn](#) | [GitHub](#)

Full-stack developer (UW–Madison BS CS, May '25) who designed, built, and launched careerlaunchonline.com, a job-application tracker for managing job searches end-to-end. Founder of Polaris AI Technologies LLC. Built CareerLaunch with React (Vite) on the front end, a Flask API + PostgreSQL on the back end, and Firebase Auth (Google SSO) for login.

EDUCATION

MS in Artificial Intelligence, DePaul University

Expected 2027

- Current GPA: 4.0

BS in Computer Science, University of Wisconsin–Madison

May 2025

- Courses: Algorithms, Artificial Intelligence, Machine Organization, Java, Python, Data Science, Building User Interfaces, Big Data Systems, Software Engineering, Human-Computer Interaction, Statistics.
- Honors/Awards: Dean's List 2020, 2021

WORK EXPERIENCE

Founder / Full-Stack Developer — Polaris AI Technologies LLC, Chicago, IL

June 2025 – Present

- Founded, designed, built, and launched CareerLaunchOnline.com, a job application tracking site to organize applications, track statuses, manage resume versions, and view basic analytics.
- Built with React (Vite) on the front end, a Flask REST API + PostgreSQL on the back end, and Firebase Auth (Google SSO) for secure, password-free login.
- Implemented responsive UI, dashboards for weekly/monthly trends with ad-support hooks for future monetization.

Website Administrator (Summer Volunteer) — Badminton Warehouse, Schaumburg, IL *May 2023 – Aug 2023, May 2024 – Aug 2024*

- Customized and maintained a Shopify e-commerce site using Liquid, HTML/CSS, and JavaScript, improving layout consistency and mobile responsiveness across product pages.
- Developed Python scripts to automate bulk product updates and keyword performance tracking, reducing manual update time by over 60%.
- Optimized product metadata and descriptions to improve SEO, resulting in top 3 Google search rankings for most target categories. Implemented web analytics to monitor site traffic and conversion behavior.

Software Developer Summer Intern — US Cellular, Schaumburg, IL

May 2022 – Aug 2022

- Automated the generation of monthly operations reports by building an API in Flask and SQLAlchemy, using optimized SQL queries. Reduced runtime by 33% and saved hours of manual effort.
- Developed a React-based internal website to visualize report data, making reports easily accessible to over 40 users.
- Collaborated with an Agile team of 4, applying iterative development and testing to incrementally deliver robust features.

SELECTED PROJECTS

Chatbot using GPT — React, OpenAI API, Bootstrap, Local Storage

- Built a persona-driven chatbot using GPT-4o API, with dynamic persona switching and persistent memory.
- Implemented real-time streaming UI with persistent session storage using Local Storage.

Chat Voice Assistant — React, Wit.AI, REST API, NLP

- Built a natural language voice chatbot integrated with Wit.AI to fetch and respond with contextual data.
- Trained custom intents to interpret user commands for help, chatroom listing, and latest messages.

Chat Mobile App — React Native, Expo, JWT, Secure Store

- Created a secure, mobile-friendly chat app with login, registration, chatroom navigation, and guest mode.
- Used expo-secure-store for JWT handling and React Navigation for drawer-based UX.

Distributed Weather Station — Python, Apache Cassandra, PySpark, gRPC

- Built a gRPC-based backend to manage weather data using Cassandra.
- Parsed and filtered data using PySpark and implemented fault-tolerant data ingestion into Cassandra.

SKILLS & INTERESTS

Programming Languages: Python, JavaScript, Java, C++, C, HTML/CSS, SQL.

Frameworks / Tools: React, Flask, SQLAlchemy, Postgres, HDFS, Spark, Cassandra, Kafka, GitHub, VS Code.

Technical Interests: Programming, AI, Data Analysis, Cross-functional Collaboration, IT Project Management, Process Improvement.
